Collaborative Research Center (CRC) 1054 ‘Control and Plasticity of Cell-Fate Decisions in the Immune System’ and its Integrated Research Training Group (IRTG) ‘Cell-Fate Decisions in the Immune System’

The Technical University of Munich (TUM) is one of the most renowned Universities in Europe. The newly established Collaborative Research Center 1054 ‘Control and Plasticity of Cell-Fate Decisions in the Immune System’ and its Integrated Research Training Group (IRTG) ‘Cell-Fate Decisions in the Immune System’, funded by the German Research Foundation (DFG), are now offering

1 Postdoc Position & 1 PhD Position in immunology

Successful candidates will employ state-of-the-art experimental approaches, cutting-edge analysis tools for immune regulatory mechanisms to pursue projects in molecular and cellular immunology. The research group headed by Prof. C. Zielinski focusses on human T cell immunology and questions related to the generation, maintenance and plasticity of human T helper cell subsets in health and disease (Zielinski et al. *Nature* 2012, Noster et al. *Sci Transl Med* 2015). The prospective candidates will have to opportunity to investigate the regulation of the human tissue resident T cells.

The Technical University of Munich is committed to a family-oriented policy and an equal opportunity employer specifically welcoming applications from female scientists. Part time employment is possible. Handicapped persons with similar qualifications will be given priority. We are looking to fill the positions as soon as possible.

Applications should be sent by email to Prof. Dr. Christina Zielinski, Institute for Medical Microbiology, Immunology and Hygiene, Technical University of Munich, Germany. Please provide a CV, letter of motivation and contact details of referees.
